

About the Course

The HSCT support course aims to provide junior physicians as well as nurses, allied health and support staff with a holistic approach to haematopoietic stem cell transplantation. This course provides a better understanding of the unique approach to the standards of care provided to both our stem cell transplant recipients and donors as well as the advancement in stem cell therapy.

Target Audience

Nurses, Transplant Coordinators, Medical Technologist, Pharmacists, Physiotherapist, Dietician, Medical Social Worker, other Allied Health Professional, as well as Medical Residents, and Overseas Delegates who are involved or have a keen interest in haematopoietic stem cell transplant.

Course Director

A/Prof William Hwang

Head & Senior Consultant, Dept of Haematology, Singapore General Hospital
Associate Professor, Duke-NUS Graduate Medical School
Medical Director, Singapore Cord Blood Bank
Current President, World Marrow Donor Association
